Beschreibung

PŁYTA INTEL S5000VSA LGA771 FB-DIMM E11011-202

- TYP: PŁYTA GŁÓWNA
- SOCKET: 2x LGA771
- PRODUCENT: INTEL
- MODEL: S5000VSA
- PAMIĘĆ RAM: DDR2 FB-DIMM, 4 SLOTY
- SATA / IDE: 6x SATA-300, RAID 0, 1, 10; 1x IDE
- CHIPSET MOSTEK PÓŁNOCNY: INTEL S5000V
- PBA: E11011-202
- 64-bit Intel® Xeon® Processor 5000 sequence allows servers to handle heavier workloads and process simultaneous requests, without increasing power consumption.
- Four/eight fully buffered DDR2 533/667 MHz DIMMs increase capacity and performance.
- Intel® I/O Acceleration Technology (Intel® I/OAT) improves application and network responsiveness by moving data to and from server applications faster.

- PCI Express* slots provide expansion headroom for the future.
- Embedded ESB2E server management lowers costs by improving baseline manageability.
- Dual Gb Ethernet increases network performance, with lower processor overhead.
- Legacy 32-bit PCI slot provides support for customers in transition.
- Integrated platform management interface 2.0 from Intel for greater ease of use.
- Designed to work with Intel® Server Chassis SC5299-E.

Additional Information

Preis	1.250,00 PLN
Produktzustand	Erneuert
EAN	755368531634
Hersteller	Intel
Sockel	771 (Socket J)
RAM	DDR2
PCI Express	2
PCI-X	2
PCI	1
Garantie	2 Jahre Garantie
